

## OpenCV - Bug # 115: Can't build OpenCV 64bit on OSX 10.6 (Snow leopard)

<b>Status:</b>	Done	<b>Priority:</b>	High
<b>Author:</b>	Gijs Molenaar	<b>Category:</b>	highgui-gui
<b>Created:</b>	2010-02-09	<b>Assignee:</b>	
<b>Updated:</b>	2012-08-16	<b>Due date:</b>	

**Affected version:****Difficulty:****Pull request:****Operating System:****HW Platform:****Description:**

The current svn code doesn't build on mac os x snow leopard with xcode 3.2.1.

Build error:

```

## History

### 2010-02-10 12:26 am - Gijs Molenaar

[[OpenCV]] 2.0 has the same problem. Strange, it is working on my previous snow leopard setup. Maybe because that was an upgrade from leopard. I think there is some issue that Carbon is being abandoned.

Ok, i'm a little bit further. OSX Carbon is not supported for x86\_64, so you need to build with -arch i386. The problem is now that a x86\_64 python can't open a i386 library.

### 2010-02-26 07:58 pm - Ryan Lei

So, can we use CMake to build without carbon and quicktime? What file should we edit?

- *Status changed from Open to Done*

- *(deleted custom field) set to fixed*

This seems to be fixed in the trunk.
