HW Platform:			
Description:	in r2968, when I try to enable the option "-D WITH_CARBON=ON", the CMake configuration still tells me: <pre> GUI Back-end: Cocoa </pre> It turns out to be a mistype in CMakeList.txt, line 1048: <pre> if(APPLE) message(STATUS "") if(HAVE_CARBON) message(STATUS " GUI Back-end: Carbon") else() message(STATUS " GUI Back-end: Cocoa") endif() message(STATUS "") endif() </pre> I think it should be if(*WITH*_CARBON). It works for me after changing that.
