Merge pull request #257 from AnnaKogan8:perf-tests-timing-script

History

2010-04-05 06:10 am - Ryan Lei

- Status changed from Open to Done

- (deleted custom field) set to worksforme

I've read that you do need the python interface, but it works for me: Mac OS X 10.6.3

```
<pre>
```

Because my cmake configuration says:

```
<pre>
```

```
-- Interfaces:  
-- Old Python:      0  
-- Python:          ON  
-- Python interpreter: /opt/local/bin/python2.6  
-- Python numpy:    0
```

```
</pre>
```

The Python interpreter goes to the one installed by Macports, not the Apple-built-in python.

The Macports one is newer (2.6.5, Apr, 2010), and the built-in one is older (2.6.1, Feb, 2010):

```
<pre>
```

```
$ /opt/local/bin/python2.6  
Python 2.6.5 (r265:79063, Apr 5 2010, 01:51:43)  
[GCC 4.2.1 (Apple Inc. build 5646) (dot 1)] on darwin
```

```
$ /usr/bin/python  
Python 2.6.1 (r261:67515, Feb 11 2010, 00:51:29)  
[GCC 4.2.1 (Apple Inc. build 5646)] on darwin
```

```
</pre>
```

2010-04-05 10:51 pm - anonymous -

romanab, can you confirm? What does the output of cmake configuration say? Thanks.
