

OpenCV - Bug # 4326: cv2.imshow does not work

Status:	Cancelled	Priority:	Normal
Author:	Yasuhiro Yoshimura	Category:	highgui-gui
Created:	2015-05-09	Assignee:	Maksim Shabunin
Updated:	2015-07-21	Due date:	
Affected version:	branch 'master' (3.0-dev)		
Difficulty:			
Pull request:			
Operating System:	Windows		
HW Platform:	x64		
Description:	<p>In OpenCV 3.0.0-rc1, cv2.imshow(python binding) does not work. Error message is as follows. On the other hand, cv::imshow(C++ API) operates correctly.</p> <pre><pre> OpenCV Error: Unspecified error (The function is not implemented. Rebuild the library with Windows, GTK+ 2.x or Carbon support. If you are on Ubuntu or Debian, install libgtk2.0-dev and pkg-config, then re-run cmake or configure script) in cvShowImage, file\\modules\\highgui\\src\\window.cpp, line 534 Traceback (most recent call last): File "C:/Users/hoge/PycharmProjects/imshow_test_opencv300/imshow_test_opencv300.py", line 7, in cv2.imshow('image', img) cv2.error:\\modules\\highgui\\src\\window.cpp:534: error: (-2) The function is not implemented. Rebuild the library with Windows, GTK+ 2.x or Carbon support. If you are on Ubuntu or Debian, install libgtk2.0-dev and pkg-config, then re-run cmake or configure script in function cvShowImage </pre></pre> <p>There is sample code and information of my environment in the following page. https://gist.github.com/atinfinity/8535fa7c9a87ed25a91b</p> <p>I found that 'window_w32.cpp' not included in 'modules/highgui/opencv_highgui.vcxproj'. Maybe, this configuration may be related to this issue.</p>

The GUI block in cmake output should look like this:

```
<pre>
-- GUI:
-- QT:          NO
-- Win32 UI:    YES
-- OpenGL support: NO
-- VTK support: NO
</pre>
```

Please, check cmake output for any warnings and related messages. Make sure you have `_WITH_WIN32UI_` cmake option enabled. Try to make clean build.

2015-05-12 06:01 pm - Yasuhiro Yoshimura

Thank you for your comment. Sorry, I overlooked the setting of WITH_WIN32UI.
I understood the reason of this error.

But, I used the following batch file to build OpenCV(WITH_WIN32UI=ON).
<https://gist.github.com/atinfinity/73ef649afb2b8b44d0f>

So, I recorded and checked the log of this build.
As a result, I found that CMake run several times when I enabled WITH_CUDA,
In this case, the setting of WITH_WIN32UI is sometimes modified.
But, I don't understand the reason.

2015-05-12 09:33 pm - Maksim Shabunin

_WITH_WIN32UI_ variable should be set to ON automatically when building on Windows. But there can be an issue with cmake scripts.

Can you please, make clean build (in empty build folder), then run cmake one-two times with same parameters in the same folder. After that, please, provide your cmake output after each run and CMakeCache.txt file contents.

Also, it is recommended to make out of source builds, i.e. use something like `set BUILD_DIR=%SOURCE_DIR%\..\build`.

Sorry for replying late.
I solved this issue thanks to your advice.
